innovation • cooperation • satisfaction

P.A.R.I.S is a **technology platform** specialized in **antibody engineering** and works for an international clientele from research and industry.

P.A.R.I.S offers:

- **Contract research and development:** P.A.R.I.S develops monoclonal antibodies for diagnostic or therapeutic purposes and immunochemical assays.

- **Contract antibody manufacturing:** P.A.R.I.S owns a tool allowing managing the cell lines and producing some milligrams to several dozens of grams of antibodies that can be used in research, diagnosis or pre-clinical studies.

- **Products valorization:** P.A.R.I.S offers a catalog of antibodies and reagents.

P.A.R.I.S also performs R&D activities on its behalf and in collaboration with academic and private laboratories.

P.A.R.I.S was founded in 2000 as a co-operative where the employees are the major shareholders and the governance is democratic.
